the European Union

Project Overview

HORIZON 30 focuses on strengthening youth participation in the labour market and civic life by equipping young people with the skills, knowledge, and opportunities needed to succeed in today's evolving workforce. The project brings together youth organisations and young people from different European countries to collaborate, exchange experiences, and propose solutions to employment-related challenges at local, national, and European levels.

Why HORIZON 30?

Youth unemployment remains one of the most critical challenges in Europe, particularly affecting young people aged 15 to 30. Despite economic recovery efforts, many young individuals continue to face barriers such as lack of quality jobs, discrimination, social exclusion, and limited access to skills development. HORIZON 30 was created to respond to these challenges by promoting equal access to the labour market and supporting young people in their transition from education to employment.

Project Objectives

The main objective of HORIZON 30 is to increase youth employment while ensuring that jobs are fair, inclusive, and sustainable. The project seeks to promote quality working conditions, social protection, equal opportunities, and the recognition of skills gained through formal, non-formal, and informal learning. Additionally, it aims to empower young people to actively contribute to the design and evaluation of employment policies that directly affect their future.

Target Groups

The primary target group of HORIZON 30 consists of young people aged 15 to 30, with particular attention given to those facing unemployment or precarious employment. The project also focuses on young people with fewer opportunities, including NEETs, individuals from disadvantaged socio-economic backgrounds, ethnic minorities, and young people with disabilities or mental health challenges. Youth organisations and policymakers are also engaged as key stakeholders.

Key Activities

HORIZON 30 includes a series of participatory and educational activities designed to enhance youth employability and civic engagement. These activities include an Entrepreneurship Youth Policy Bootcamp, online labour market policy forums, digital seminars, round tables, and empowerment symposiums. Through these activities, participants develop practical skills, exchange good practices, and engage in structured dialogue on labour market challenges and solutions.

Youth Participation and Civic Engagement

Youth participation is at the core of the HORIZON 30 project. Young people are actively involved in the preparation, implementation, and evaluation of all project activities. By engaging in dialogue with decision-makers and contributing to policy discussions, participants strengthen their democratic competencies, gain confidence, and develop a sense of ownership over social and economic change within their communities.

European Dimension

HORIZON 30 is closely aligned with European Youth Goal 7, which focuses on quality employment for all young people. The project supports the objectives of the EU Youth Dialogue and Erasmus+ by promoting European values such as equality, solidarity, inclusion, and active citizenship. Through transnational cooperation, the project fosters mutual understanding and strengthens a shared European identity among young participants.

Expected Impact

The project is expected to have a strong impact on both participants and the wider community. Young people will improve their employability, develop key transversal skills, and increase their awareness of labour market rights and opportunities. At a broader level, HORIZON 30 contributes to reducing discrimination, strengthening youth voices in policymaking, and promoting inclusive employment practices across Europe.

Conclusion

HORIZON 30 represents a comprehensive approach to tackling youth unemployment through participation, education, and policy dialogue. By empowering young people to become active contributors to the labour market and democratic life, the project lays the foundation for a more resilient, inclusive, and future-oriented European workforce. Ultimately, HORIZON 30 invests in young people as key drivers of social and economic progress.

Thank you for your attention!
