We are excited to officially announce the successful launch of the HORIZON 30 project, marking the beginning of an innovative journey in non-formal education and youth development. The first phase of the project has already laid strong foundations, with key milestones achieved and several important processes currently underway.

Our Visual Identity: The HORIZON 30 Logo

One of the first achievements of the project has been the creation of the HORIZON 30 logo. This visual identity reflects the core values of the project—innovation, collaboration, and forward-thinking learning. The logo will serve as a unifying symbol across all project activities, materials, and dissemination efforts, strengthening the project's visibility and recognition at both local and international levels.

Development of the HORIZON 30 Handbook

We are currently in the process of developing the HORIZON 30 Handbook, which will serve as a comprehensive guide to the methodology. This handbook will include:

- Theoretical foundations (non-formal education, experiential learning, constructivism, social learning)
- Practical tools and activities for implementation
- Guidelines for facilitators and organisations
- Best practices and case studies

The handbook aims to ensure that the methodology is accessible, transferable, and easy to implement in different contexts. It will be a key output of the project, supporting both current partners and future users.

Looking Ahead

In the coming months, the project will move into more active phases of development and implementation. Upcoming steps include:

- Finalisation of the HORIZON 30 Handbook
- Preparation of training activities and pilot implementations
- Engagement of participants and stakeholders through outreach actions
- Development of learning materials and tools

These activities will further strengthen the project's impact and bring the methodology closer to real-life application.
