HORIZON

Advancing
Youth
Participation &
Labour Market
Engagement

www.horizon30.eu

The HORIZON 30 project continues to move forward with significant progress across multiple phases of implementation. Over the past months, partners have been actively working on participant engagement, event preparation, and the development of key activities aligned with European priorities, particularly EU Youth Goal #7: Quality Employment for All.

Activity Reporting & Knowledge Documentation

A comprehensive Activity Report has been developed following the implementation of the first project actions. This report includes:

- A detailed agenda of the activities
- Video and data materials collected during sessions
- Presentations delivered throughout the activities
- A structured feedback report based on participant evaluations

This documentation ensures transparency, supports evaluation, and contributes to the continuous improvement of the HORIZON 30 methodology.

Launching the Participant Selection Process

The project has officially initiated its participant selection process, marking a key step in engaging young people in upcoming activities. A Google Form has been designed and disseminated across various social media platforms to ensure wide outreach and accessibility.

This process aims to identify motivated individuals who are eager to contribute to youth participation and labour market discussions. By reaching a diverse audience, the project ensures inclusivity and equal opportunities for engagement.
